PLEASE NOTE

- **Push** side: the door opens simply by pushing.
- **Pull** side: a pull, knob, or handle must be installed to pull the door open.
- Closing: when closing the door by pulling it towards you, **do not slam it**, as this may damage the frame or the wall. 👉 We recommend installing a **small pull or knob** on this side as well, to close the door safely.
- A handle can be installed **on the perimeter of the door panel (9 cm width)** using any preferred model.

Handle

Olivari

Model: **LAMA**

Designer: Giò Ponti
Year of Design: 1956

Finish Code: CO_Satin Chrome
Olivari Code: M107

In his long and fruitful collaboration with Olivari, Ponti developed two different approaches to designing door handles. One was organic and more functional, in which the lever fits naturally into the hand thanks to its soft, sinuous shape. The other was geometric, **where the hand "naturally" adapts to the form itself**. The first approach led him to design "independent forms," more expressive and influenced by ergonomic requirements.
